Prof Ram Meghe Institute of Technology And Research Badnera Amravati

Deep Learning (7AD02)

Question Bank

Unit 1

UNIT-1 13 MARKS

1. Describe Gradient-based Optimization?
2. Explain Neural Network in brief.
3. What is deep learning? Why there is a need in today's world?
4. Explain Machine Learning? Why there is a need in today's world?
5. Describe in brief history of Machine Learning?
6. What do you mean by data representation for neural network? Explain in brief.
7. Difference between Machine Learning and Deep Learning.

UNIT-2 14 MARKS

1. How deep learning can be useful in terms of Predicting house prices?
2. Explain four branches of Machine Learning
3. What is Anatomy of Neural Network?
4. Explain Keras in brief.
5. Describe the universal workflow of machine learning?
6. What is data preprocessing? Explain feature engineering and feature learning in detail?
7. Difference between overfitting & underfitting?
8. Explain :1) Data Pre-processing 2) Feature Engineering

UNIT-3 13 MARKS

1. How deep learning is useful for computer vision?
2. Define Convnet? How to training a ConvNet from scratch on a small dataset?
3. How to train a ConvNet using pretrained ConvNet?
4. How ConvNet learn from visualization?
5. Explain the Domain Of computer vision in brief & also state examples of it?
6. Explain ConvNet & its visualization in brief.

UNIT-4 13 MARKS

1. What are challenges when working with textual data while working with deep learning?
2. Explain sequences processing with convnets.
3. Describe in brief RNN & its uses? 13 marks
4. Explain Recurrent Neural Network in brief.
5. How deep learning can be useful Text and Sequences?
6. Describe the advanced use of Recurrent Neural network in brief.

UNIT-5 14 MARKS

1. Explain Text generation with LSTM 271?
2. Explain : 1) Deep Dream 2) Neural Style Transfer.
3. State different limitations of Deep Learning?
4. Explain the future of Deep Learning?
5. What makes Deep Learning special within Machine Learning?
6. Explain Local generalization & extreme generalization?
7. Explain in brief Advanced Deep Learning.
8. Explain Keras Functional API in detail.
9. How to generate images using variational auto encoders?
10. Explain Generative Deep learning?

UNIT-6 13 MARKS

1. Explain the limitations of Deep learning in detail.
2. What are the key concepts behind developing deep learning?
3. Describe in brief the future of deep learning?
4. How can Deep learning helpful in a fast moving field?
5. Explain Local generalization and extreme generalization.
6. What makes Deep learning Special within machine Learning Field.

Subject Incharge

Prof. N. A. Kandalkar
